

## Vial of Life Program

Since 1999, ERH Parish Health Ministry has provided free vial containers, forms and magnets to partnering congregations and institutions. Individuals receiving the vials are encouraged to complete the health forms, in pencil if possible, place the completed forms in the vial and place the vial in the refrigerator. The magnet is then placed on the outside of the refrigerator. In case of a medical emergency, first responders will see that obtaining crucial medical information is as easy as opening the refrigerator and retrieving the vial.

Health ministry leaders at partnering congregations and institutions are encouraged to remind their members to update the medical form within the vial on an ongoing basis. A good time to send out a reminder to update the form is when we set our clocks for daylight savings time each fall & spring.
