Master Plan Updates

Information related to our upcoming renovation

Keeping our residents informed about the Master Plan is a top priority.

Next Steps in the Victoria Building

Like we mentioned previously, the vast majority of the Master Plan work being done now is behind closed doors. We hardly notice anything been done. Rest assured, Ridge Stone staff are working hard and making great progress. We are actually a little ahead of schedule as of now.

For those of you who live in the Victoria building you are about to see some very visually impactful work starting on the 6th floor. Soon, we will begin the installation of hand rails, base boards and new carpeting.

There is a real system for doing this work efficiently. We will begin by installing the handrails and move on to the baseboards, then the carpet. When we do the baseboards the current carpet will be cut out along the walls. This will allow for easier installation of new baseboards. The most beneficial aspect is that we don't have to worry about getting paint on the new carpet. After the baseboard is painted we will then install the new carpet.

There will be two crews working on this. One will do the handrail and baseboards. When they finish their work they will move on to the next floor and the carpet layers will come in and door their part.

At no time will any of the hallways be closed! We have done this before and our system works well. The staff are so very considerate and are happy to move items out of the way to allow you to pass. Your safety is their highest priority! However, please be cautious!

If you have any questions or have concerns, please contact Stephanie Antoun or Emerson Stambaugh.
